</head>
<body>

<h3>Difference between display:none and visibility: hidden</h3>
<p><strong>visibility:hidden</strong> hides the element, but it still
takes up space in the layout.</p>
<p><strong>display:none</strong> removes the element from the document.
It does not take up any space.</p>

<div class="imgbox" id="imgbox1">Box 1<br>

<body>

  <p class="flip" onclick="myFunction()">Click to show panel</p>

  <div id="panel">
    <p>This panel contains a div element, which is hidden by
default (display: none).</p>
    <p>It is styled with CSS and we use JavaScript to show it
(display: block).</p>
    <p>How it works: Notice that the p element with class="flip"
has an onclick attribute attached to it. When the
      user clicks on the p element, a function called
myFunction() is executed, which changes the style of the div
      with id="panel" from display:none (hidden) to display:block
(visible).</p>
