Grid of Boxes / Equal Width Boxes

float

```
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Grid of Boxes</title>
  <style>
    * {
      box-sizing: border-box;
    }

    .box {
      float: left;
      width: 33.33%;
      padding: 50px;
    }
  </style>
</head>
</html>
```

```
.clearfix::after {
    content: "";
    clear: both;
    display: table;
}
</style>
</head>
<body>

<h2>Grid of Boxes</h2>
<p>Float boxes side by side:</p>

<div class="clearfix">
  <div class="box" style="background-color:#bbb">
    <p>Some text inside the box.</p>
  </div>
  <div class="box" style="background-color:#ccc">
    <p>Some text inside the box.</p>
  </div>
  <div class="box" style="background-color:#ddd">
    <p>Some text inside the box.</p>
  </div>
</div>

<p>
  Note that w also us the clearfix hack to take care of the layout
  flow, and that add the box-sizing property to make sure that the box doesn't
  break due to extra padding. Try to remove this
  code to see the effect.
</p>
</body>
</html>
```
