- CSS The display:inline-block value

The display: inline-block value

```
display: inline                      ,                     display: inline-block
                               .

   , display: inline-block        ,               /                  , display:
inline                     /                   .

display: block              ,                 display: inline-block
       (line-break)                  ,                                  .

            display: inlin , display: inline-block        display: block
                       .
```

```
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">

```

Using inline-block to Create Navigation Links

display: inline-block   (   )   (   )
                    .
              (   )   .

```html
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Horizontal Navigation Links</title>
    <style>
        .nav {
            background-color: yellow;
            list-style-type: none;
            text-align: center;
            margin: 0;
            padding: 0;
        }
        .nav li {
            display: inline-block;
            font-size: 20px;
            padding: 20px;
        }
    </style>
</head>
<body>
    <h1>Horizontal Navigation Links</h1>
    <p>
        By default, list items are displayed vertically. In this exmaple, we
use display: inline-block to display them horizontally (side by side).
    </p>
    <p>
        Note: If you resize the browser widnow, the links will automatically
```

```
break when it becomes too crowded.
    </p>
    <ul class="nav">
        <li><a href="#home">Home</a></li>
        <li><a href="#about">About Us</a></li>
        <li><a href="#clients">Our Clients</a></li>
        <li><a href="#contact">Contact Us</a></li>
    </ul>
</body>
</html>
```
