HTML Images Syntax

The src Attribute

The alt Attribute

```
가
                                                           alt
                                                         가
(
                  , src
                                                                                          )
alt
```

If a browser cannot find the image, it will display the alternate text:

Tip:

```
가
(screen reader)
               HTML
                             가
          가
```

Image Size - Width and Height

```
(width)
                       (height)
                                           style
<img src = "img_girl.jpg" alt="Girl in a jacket" style="width:500px;</pre>
height:600px;">
       , width
                    height
<img src="img girl.jpg" alt="Girl in a jacket" width="500" height="600">
width
       height
Note:
                                               가
                   가
```

Width and Height, or Style?

```
width, height,
                    style
                                HTML
                                                       가
      style
```

/* This style sets the width of all images to 100%: */ img { width: 100%; }

2025/12/14 18:51 3/5 HTML Images

Width/Height Attribute or Style?

The first image uses the width attribute (set to 128 pixels), but the style in the head section overrides it, and sets the width to 100%;

The second image uses the style attribute to set the width to 128 pixels, this will not be overridden by the style in the head section:

Images in Another Folder

```
가 , src .
```

```
<img src="/images/html5.gif" alt="HTML5 Icon" style="width:128px;
height:128px;">
```

Images on Another Server/Website

```
가 , src (an absolute (full) URL)
```

```
<img src="https://www.w3schools.com/images/w3schools_green.jpg"
alt="W3Schools.com">
```

Note on external images

. 가

Animated Images

```
HTML GIF
```

```
<img src="programming.gif" alt="Computer Man" style="width:48px;
height:48px;">
```
