## Source of the article

- [JavaScript - HTML DOM Methods](#)

HTML DOM     (methods)   HTML                              (actions)        .

HTML DOM     (properties)                         HTML          (values)        .

## The DOM Programming Interface

HTML DOM    JavaScript                                        .

DOM      ,       HTML                                   .

                                                                       .

    (property)    HTML                          ,                              .

      (method)    HTML                                                                      .

          id="demo"        p              (innerHTML)                     :

## My First Page

          , ''getElementById''                  , ''innerHTML''                    .

# The getElementById Method

HTML                                                            ''id''                                              .

              , ''getElementById''                                  ''id="demo''                            .

# The innerHTML Property

                                              ''innerHTML''                                      .

''innerHTML''              HTML                                                          .

**''innerHTML''**          **''<html>''**   **''<body>''**                        **HTML**
                          .
