• JavaScript Function Parameters

JavaScript function _______parameter values (arguments:

function Parameters and Arguments

(functions) (parameters) 가 :

function functionNmae(parameter1, parameter2, parameter3) {
 // code to be executed
}

(parameters) (manes) .
(arguments) , 가 (values)

Parameter Rules

JavaScript

JavaScript . JavaScript .

Default Parameters

_____m^{missing argument}() , undefined

<!DOCTYPE html>
<html>
<hody>

Setting a default value to a function parameter.

<script>
 function myFunction(x, y) {
 if (y === undefined) {
 y = 2;
 }
 return x * y;
 }
 document.getElementById("demo").innerHTML = myFunction(4);
</script>

</body>
</html>

ECMAScript 2015

```
<!DOCTYPE html>
<html>
<body>

Setting a default value to a function parameter (y=2).

<script>
  function myFunction(x, y = 2) {
    return x * y;
  }
  document.getElementById("demo").innerHTML = myFunction(4);
  </script>

</body>
</html>
```

The Arguments Object

```
JavaScript arguments 가 . . . .
```

가

```
<!DOCTYPE html>
<html>
<body>
  Finding the largest number.
 <script>
   function findMax() {
     var i;
     var max = -Infinity;
     for (i = 0; i < arguments.length; i++) {
       if (arguments[i] > max) {
         max = arguments[i];
     }
     return max;
   document.getElementById("demo").innerHTML = findMax(4, 5, 6);
 </script>
</body>
</html>
```

(input values)

가	() .	the arguments object

Arguments are Passed by Value

JavaScript (value) 가 가

Objects are Passed by Reference

JavaScript 가 ,, Javascript, Function, Parameters
