## the source of this article

[JavaScript For Loop](#)  
(Loops)

## JavaScript Loops

가

## Instead of writing

```
text += cars[0] + "<br>";  
text += cars[1] + "<br>";  
text += cars[2] + "<br>";  
text += cars[3] + "<br>";  
text += cars[4] + "<br>";  
text += cars[5] + "<br>";
```

## You can write

```
let cars = ["BMW", "Volvo", "Saab", "Ford", "Fiat", "Audi"];  
let text = "";  
let i;  
for (i = 0; i < cars.length; i++) {  
    text += cars[i] + "<br>";  
}  
document.getElementById("demo").innerHTML = text;
```

# Different Kinds of Loops

JavaScript

- for -
- for/in -
- for/of - 가 (iterable, )
- while - true
- do/while - true

## The For Loop

for

```
for (statement 1; statement 2; statement 3) {  
  // code block to be executed  
}
```

**Statement 1** ( )

**Statement 2**

**Statement 3** ( )

```
let text = "";  
let i;  
for (i = 0; i < 5; i++) {  
  text += "The number is " + i + "<br>";  
}  
document.getElementById("demo").innerHTML = text;
```

Statement 1 가 (var i = 0).

Statement 2 (i 5 ).

Statement 3 (i ++ ) 가 .

## Statement 1

statement 1

(i = 0).

```

, JavaScript
statement 1
statement 1 ( )

```

```

let cars = ["BMW", "Volvo", "Saab", "Ford"];
let i, len, text;
for (i = 0, len = cars.length, text = ""; i < len; i++) {
  text += cars[i] + "<br>";
}
document.getElementById("demo").innerHTML = text;

```

```

loop가
statment 1

```

```

let cars = ["BMW", "Volvo", "Saab", "Ford"];
let i = 2;
let len = cars.length;
let text = "";

for (; i < len; i++) {
  text += cars[i] + "<br>";
}
document.getElementById("demo").innerHTML = text; // Saab<br>Ford

```

## Statement 2

```

statement 2
, JavaScript
statement 2
statement 2가 true
가
, false
가

```

```

statement 2
break
가

```

## Statement 3

```

statement 3
, JavaScript
statement 3
statement 3
가 (i--),
가 (i = i + 15)

```

statement 3 ( : 가 ):

```
let cars = ["BMW", "Volvo", "Saab", "Ford"];

let i = 0;
let len = cars.length;
let text = "";

for (; i < len;) {
  text += cars[i] + "<br>";
  i++;
}
document.getElementById("demo").innerHTML = text;
```
