## Set Content - text(), html(), and val()

.

- text() -                              .
- html() -              (HTML              )                                    .
- val() -                                        .

      jQuery text(), html()    val()

.

```
$(document).ready(function () {
  $("#btn1").click(function () {
    $("#test1").text("Hello World!!!");
  });
  $("#btn2").click(function () {
    $("#test2").html("<b>Hello World!!<b>");
  });
  $("#btn3").click(function () {
    $("#test3").val("Holy God!!!");
  });
});
```

## A Callback Function for text(), html(), and val()

          jQuery            text(), html()    val()                              .
                                  -                                      (index)         (    )
  -              :
                                                    .

                      text()    html()                      .

```
    $(document).ready(function () {
      $("#btn1").click(function () {
        $("#test1").text(function (i, origText) {
          return "Old text: " + origText + " New text: Hello world! (index:
" + i + ")";
        });
      });

      $("#btn2").click(function () {
        $("#test2").html(function (i, origText) {
          return "Old html: " + origText + " New html: Hello <b>world</b>
(index: " + i + ")";
        });
      });
    });
```
# Set Attributes - attr()

jQuery `attr()`                     /                    .

                href              (    )                    .

`attr()`                                                    .

         href    title                                   .

# A Callback Function for attr()

jQuery         `attr()`                            .

.

(     )                    .

.

attr()                     .
