SpringBoot + React

.

```java
//
@Getter
public static class User
{
    int id;
    String username;
    String passwd;
    String email;

    public User(int id, String username, String passwd, String email)
    {
        this.id = id;
        this.username = username;
        this.passwd = passwd;
        this.email = email;
    }
}
```

```java
@RestController
public class HiReactController
{
    //
    @PostMapping("/api/users")
    public User user()
    {
        System.out.println(":::  HiReactController IN :::");
        User user = new User(1, "eleven", "1234", "jskim@repia.com");

        return user;
    }

}
```

proxy   axios

```
PS D:\eclipse_repository\demoReact\react-app> npm install axios
```
