Term

Bundler()

import

export

Configuration

webpack.config.js configuration

```
const path = require('path');
module.exports = {
  mode: "development", //      production
  entry: "./source/index.js",
  output:{
```

```
        path: path.resolve(__dirname, "public"), // __dirname mean
webpack.config.js가
    filename: 'index_Bundle.js'
}
}
```

1: npx webpack -config webpack.config.js or npx webpack -config webpack.config.prod.js
2: npx webpack (webpack.config.js 가)

Install

1. Node.js
2. npm init
3. npm install -D webpack webpack-cli // -D = -save-dev
4. npx webpack -entry source/index.js -output ./public/index_bundle.js

CSS

Loader css bundle loaders

```
npm install --save-dev style-loader css-loader
```

```
const path = require('path');
module.exports = {
  mode: "development", //      production
  entry: "./source/index.js",
  output: {
    path: path.resolve(__dirname, "public"), // __dirname mean
    webpack.config.js가
    filename: 'index_Bundle.js'
  },
  module: [
    rules: [
      {
        test: /\.css$/,
        use: [ //          (chaining)
              'style-loader', // js -> css
              'css-loader' // *.css -> js
            ]
      }
    ]
  }
}
```

: npx webpack

Output
