6. (Declarations)

6.1

```
int level; //  
int size; //
```

```
int level, size;
```

Note : (type) (identifier)
가 .

```
int level; //
```

```
int      size;    //
Object  currentEntry; //
```

6.2 (Initialization)

6.3 (replacement)

· (" { " " " } ") .

```
void myMethod() {
    int int1 = 0; // ...
    if (condition) {
        int int2 = 0; // %%"if"%%
        ...
    }
}
</blockquote>
```

가 for , Java for

```
for (int i = 0; i < maxLoops; i++) { ... }  
</blockquote>
```

```
int count;  
...  
myMethod() {
```

```
if (condition) {  
    int count = 0;  
    ...  
}  
...  
}
```

6.4 Class and Interface Declarations

Java

```
class Sample extends Object {  
    int ivar1;  
    int ivar2;  
  
    Sample (int i, int j) {  
        ivar1 = i;  
        ivar2 = j;  
    }  
  
    int emptyMethod() {}  
  
    ...  
}
```
