Code Conventions for the Java Programming Language

6.　　　(Declarations)

6.1

.　　　　　　,

```
int level;    //
int size;     //
```

.

```
int level, size;
```

.　　:

```
int foo, fooarray[];    //              .
```

Note :　　　　　　(type)　　　　(identifier)　　　　　　　　.
.　　　　:

```
int       level;           //
```

```
  int       size;            //
  Object    currentEntry;    //
```

6.2   (Initialization)

.

.

6.3   (replacement)

. ("{ "   "} "   .)
.
.

```
void myMethod() {
    int int1 = 0;        //

    if (condition) {

        int int2 = 0;    // %%"if"%%
        ...
    }
}
</blockquote>
```

for   , Java   for
.

```
for (int i = 0; i < maxLoops; i++) { ... }
</blockquote>
```

.
.

```
int count;
...
myMethod() {
```

```
    if (condition) {
        int count = 0;        //                                    .
        ...
    }
    ...
}
```

6.4 Class and Interface Declarations

Java   ,   .

- "{"   .
- "{   .
- "}"   "{"   null   ,   "}"
                            "{"   .

```
class Sample extends Object {
    int ivar1;
    int ivar2;

    Sample (int i, int j) {
        ivar1 = i;
        ivar2 = j;
    }

    int emptyMethod() {}

    ...
}
```

-                                    .
