Troubleshooting

- System has not been booted with systemd as init system (PID 1). Can't operate. Failed to connect to bus: Host is down

```
$ sudo apt install daemonize dbus-user-session fontconfig
$ sudo daemonize /usr/bin/unshare --fork --pid --mount-proc
/lib/systemd/systemd --system-unit=basic.target
$ exec sudo nsenter -t $(pidof systemd) -a su - $LOGNAME
$ snap version

// 서비스 목록 확인하기
$> service --status-all

$> systemctl list-units --type=service
```

> [+] running, [-] stopped service

Ref

- wsl에서 systemctl 실패할 때
