SpringBoot

Spring Boot Batch

Spring Boot Batch] ===== Jpa(Java API) ===== \\ 1. [[https://velog.io/@jayjay28/JPA%EB%A5%BC-%EC%9D%B4%EC%9A%A9%ED%95%9C-%EB%8B%A8%EC%88%9C-%EA%B2%8C%EC%8B%9C%EB%AC%BC-%EC%B2%98%EB%A6%AC|JPA

Annotation

- Spring boot Annotation

Batch

4. Spring batch, boot .

Tasklet VS Chunk

	Tasklet	Chunk
When to use		' . .
How it works	.	.
Usage	.	Step .
Use Case	.	'

Troubleshooting

1. Run As Spring Boot App

```
Steps: 1. go to Run->Run configuration -> Maven Build -> New configuration
Steps: 2. set base directory of you project ie.${workspace_loc:/${
  }}
Steps: 3. set goal spring-boot:run
Steps: 4. Run project from Run->${        }
```

How to run Spring Boot web application in Eclipse itself?

2. pom.xml Error   : Plugin execution not covered by lifecycle configuration

```
In Eclipse Luna 4.4.0, you can chose to ignore this error in preferences
```

Window > Preferences > Maven > Errors/Warnings > Plugin execution not covered by lifecycle configuration. Select Ignore / Warning / Error as you wish. Also, in the quick fix (Ctrl + 1) for this error, it gives an option to mark goal as ignored in Eclipse build in Eclipse preferences (experimental) This is a cleaner way, as it doesn't modify your pom.xml. You will need to do a Maven > Update project to fix the same error in any other project as well.

How to solve "Plugin execution not covered by lifecycle configuration" for Spring Data Maven Builds
